SUMMARY

Final-year Computer Science student currently working as a **Full Stack Developer Intern**, gaining hands-on experience on real-world projects. Experienced in building REST APIs, handling backend logic, authentication, and developing responsive user interfaces. Familiar with working in Agile teams, writing clean and structured code, and improving applications through debugging and optimization. Focused on learning through practical development and building scalable solutions.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, SQL
- **Frontend:** HTML, CSS, React.js, Bootstrap, Tailwind CSS, Material UI, shadcn/ui
- **Backend:** Node.js, Express.js, Flask
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, Supabase, Postman, Swagger, DB Designer, JSON parser

EXPERIENCE

[Iloma Technology](#) — Hybrid
Software Developer Intern

Nagpur, Maharashtra
Jan 15, 2026 – Present (6-Month Internship)

Key Responsibilities & Achievements:

- Developed real-world applications using MERN stack and Python (Flask), including a **production-level Voter Management System built with Flask** to manage, search, and analyze large-scale voter data.
- Designed and built scalable RESTful APIs with Node.js/Express and Flask, implementing key features like multi-filter search, voter classification, and bulk CSV import/export.
- Integrated React.js frontend with backend services and followed **clean architecture (MVC, Service, Repository)** to ensure scalability, maintainability, and structured code.
- Implemented **JWT Authentication and Role-Based Access Control (RBAC)** to secure APIs and manage different user roles effectively.
- Optimized application performance, performed API testing using Postman, and collaborated in Agile/Scrum teams using Git & GitHub (PRs, branching, merge conflict resolution).

ACADEMIC PROJECTS

Movie Ticket Booking Platform (MERN Stack)

- Built a full-stack movie ticket booking system with Clerk-based authentication, role-based access, and separate Admin/User modules.
- Developed REST APIs and admin features for movie upload, show scheduling, seat management, and booking control.
- Designed an interactive UI for users to browse movies, check availability, and book seats, ensuring smooth and conflict-free bookings.
- **Tech stack:** Node.js, Express.js, MongoDB Atlas, React.js, Tailwind, Vercel, Clerk
- **Live Project Link :** <https://one-show.vercel.app/>

MediTalk – AI Powered Healthcare Chatbot

- Built an AI-driven healthcare chatbot capable of understanding and responding to user queries through text, voice, and image inputs.
- Integrated secure authentication, multilingual support, and a clean UI using React + Tailwind for a smooth user experience.
- Configured and deployed a Supabase cloud database for real-time data handling and hosted the full application on Netlify for fast, reliable access.
- **Tech Stack:** React, TypeScript, Tailwind CSS, Supabase, PostgreSQL
- **Live project Link :** <https://meditalk-healthcare-assistant.netlify.app/>

EDUCATION

B-Tech in Computer Science (2022–2026)
GH Raisonni University, Amravati
CGPA: 7.5

Higher Secondary (2020-2022)
Shah Babu Junior College, Patur
Percentage: 85.67%
